

BIG THOUGHT AND

BIG PRINT

Preimage Group offers large format digital printing services. The production cycle is completely managed in-house, supported by cutting-edge technology and qualified personnel. Since 1983 as a pre-printing and photolithography company, we have acquired experience and expertise in the preparation of files and in the verification of colour shades - essential features to guarantee quality prints and assistance to our customers. The evolution of the market led us in 1999 to explore the digital printing sector. Curiosity, passion, the desire to grow and to learn are the motivations that spur our staff every day. A close-knit, dynamic and flexible team - combined with an integrated order management system - allows us to guarantee perfect work management and delivery time compliance.
